PROFILE

Software Engineering MSc graduate with commercial experience developing, deploying and supporting full-stack applications and web systems using C#, .NET, JavaScript, SQL and PostgreSQL. Experienced across software development, database systems, Linux environments, API integration, debugging, system configuration and technical troubleshooting. Strong background in translating requirements into reliable technical solutions, working with clients and cross-functional teams, and independently investigating and resolving issues across development and production environments.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET, ASP.NET Core, JavaScript, Python, Java, C++, HTML, CSS, React, Node.js
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures, System Design, Debugging, Troubleshooting, Performance Optimisation, API Integration
- **Databases & Data:** SQL, PostgreSQL, Entity Framework Core, JSON, Database Design, Database Migrations, Data Processing
- **Systems & Deployment:** Linux, Git, GitHub, Application Configuration, Server Configuration, Production Deployment, systemd, Kestrel
- **Web & UX:** Responsive Design, HCI, Accessibility-Focused Design, CMS Development, REST APIs
- **Tools & Methodologies:** Visual Studio, VS Code, Jupyter, Google Colab, Agile/Scrum, Cross-functional Collaboration

WORK EXPERIENCE

Full Stack Web Developer (Junior) Kettering, UK
Verto Nov 2025 – May 2026

- Developed and maintained production websites and custom systems using C#, .NET, JavaScript, HTML, CSS and SQL, translating client requirements into functional technical solutions.
- Designed and implemented 10+ responsive UI features with limited documentation, independently investigating issues, debugging systems and maintaining consistency across applications.
- Worked with cross-functional teams and clients throughout development, gathering requirements, incorporating feedback, resolving technical issues and providing system training.
- Configured and supported database-driven applications, contributed to CMS functionality and assisted with deployment and production troubleshooting.

Achievements:

- Delivered a core functional product in 3 days against a 5 day deadline, utilising the 40% time savings for **continuous incremental improvement** and refinement.
- Independently designed and developed 10+ UI features (including responsive design) with limited documentation, applying strong **problem-solving** to ensure systemic consistency.
- Developed and launched a website 3 weeks before the predicted deadline

Game Developer (Internship) Leicester, UK

National Space Centre Jan 2023 – Apr 2023

- Developed an interactive C#/Unity application within a 5-person team, integrating software with projection and motion-tracking hardware.
- Investigated technical issues across software and external hardware, debugging and optimising real-time performance to improve frame-rate stability by approximately 30%.
- Conducted usability testing with 20+ users and collaborated with technical and creative team members to identify issues and refine the system.

Achievements:

- Optimised real-time performance, heavily **debugging** systems to increase hardware frame rates by 30% for smooth motion tracking.

TECHNICAL EXPERIENCE

Personal Portfolio (C#, ASP.NET Core, Razor, PostgreSQL, EF Core, JavaScript)

- Developed a database-driven portfolio and CMS supporting dynamic content management and authenticated administration.
- Implemented PostgreSQL database structures and EF Core migrations while troubleshooting configuration and deployment issues.
- Deployed and configured the application on a Linux server, investigating production issues and validating live application behaviour.

Cybersecurity Data Redaction Tool (Java)

- Developed a Java application to detect and censor sensitive information from user input using modular OOP design.
- Implemented text-processing and validation logic to support secure data-handling workflows.

EDUCATION

University of Leicester (Leicester, UK)

- Advanced Software Engineering MSc | Distinction Sep 2024 – Sep 2025
- Creative Computing BSc | Second Upper Class Honours Sep 2021 – Jun 2024

LANGUAGES & INTERESTS

English (Fluent) | Polish (Fluent) | Russian (Basic) | Spanish (Intermediate)
