PROFILE

Software Engineering MSc graduate with multidisciplinary experience across software engineering, web development, AI technologies, database systems, and immersive media development. Skilled in developing technical solutions using C#, Python, JavaScript, Java, SQL, and modern development frameworks within collaborative and independent environments. Experienced in full-stack development, API integration, system optimisation, UX/UI design, and interactive application development, with projects ranging from AI-powered platforms and VR experiences to database-driven systems and machine learning applications. Strong combination of technical engineering knowledge and creative problem solving, focused on building innovative, user-focused, and accessible digital solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, C#, Python, Java, C++, HTML, CSS, React, Node.js, .NET, Web Forms
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures, Debugging, System-Level Design, Performance Optimisation
- **AI, Data & Databases:** SQL, JSON, Firebase, OpenAI API, Deep Learning, Data Organisation
- **Tools & Methodologies:** Git, GitHub, Visual Studio, Linux, Jupyter, Google Colab, Agile/Scrum, Cross-platform development
- **UX/UI & 3D Interactive:** Responsive Design, Human-Computer Interaction (HCI), Unity, GameMaker, Blender, CMS

WORK EXPERIENCE

Full Stack Web Developer (Junior)

Kettering, UK

Verto

Nov 2025 – Apr 2026

- Developed 3 full-stack websites and a custom signature using HTML, CSS, JavaScript, C#, and SQL based on precise client requirements.
- Conducted a rational, process-oriented approach to site configuration, collaborating seamlessly with 2 **cross-functional** internal teams.
- Incorporated iterative client feedback to launch live platforms, trained 2 clients on custom systems, and enhanced the company's official project sign-off website.

Achievements:

- Delivered a core functional product in 3 days against a 5 day deadline, utilising the 40% time savings for **continuous incremental improvement** and refinement.
- Independently designed and developed 10+ UI features (including responsive design) with limited documentation, applying strong **problem-solving** to ensure systemic consistency.
- Developed and launched a website 3 weeks before the predicted deadline

Game Developer (Internship)

National Space Centre

Leicester, UK

Jan 2023 – Apr 2023

- Collaborated within a 5-person team to develop an interactive projection-based game teaching environmental themes to younger audiences.
- Developed complex gameplay mechanics in **C#** using Unity, integrating software into hardware-based motion interaction systems.
- Applied **Human-Computer Interaction (HCI)** principles, conducting **usability testing** with 20+ users to rationally analyse and improve the user experience.

Achievements:

- Optimised real-time performance, heavily **debugging** systems to increase hardware frame rates by 30% for smooth motion tracking.
- Supported seamless **cross-platform** functionality across PC and specialised projection hardware systems.

TECHNICAL EXPERIENCE

VR Horror Game Development (Unity, C#, Audacity)

- Designed and developed 3 immersive Oculus VR experiences, prioritising user exploration, complex puzzle mechanics, and strict **performance optimisation** to maintain high framerates.
- Engineered diverse interactive systems across multiple projects: a narrative-driven horror game with complex NPC deception mechanics, an underwater escape room integrating 15+ animated 3D models, and an educational Shakespearean module containing 10+ chronological quizzes.

AI-Powered Fashion Website (HTML, CSS, JavaScript, Python, OpenAI API)

- Collaborated within a 3 developer team to build a comprehensive web app featuring an engineered outfit generator, conversational chatbot, and dynamic content generation.
- Embedded **accessibility and inclusion** by designing an intuitive UI with specialised colour filters, enabling users to seamlessly switch between 5 distinct accessible viewing modes.

EDUCATION

University of Leicester (Leicester, UK)

- | | |
|---|---------------------|
| • Advanced Software Engineering MSc Distinction | Sep 2024 – Sep 2025 |
| • Creative Computing BSc Second Upper Class Honours | Sep 2021 – Jun 2024 |

LANGUAGES & INTERESTS

English (Fluent) | Polish (Fluent) | Russian (Basic) | Spanish (Intermediate)
Crocheting | Creative Writing | Embroidery | Painting
